Li-ion battery, 3.7V 2600mAh
Model: ICR18650-2600mAh-3.7V-1S1P

TECHNICAL SPECIFICATIONS

|	
Frequency control	Crystal controlled PLL synthesizer
Transmit frequency	Baby unit: 2405 - 2475 MHz / Parent unit: 2405 - 2475 MHz
Channels	32
LCD	2.8" Color LCD (QVGA 320x240 pixel)
Nominal effective range	Maximum power allowed by FCC and IC. Actual operating range may vary according to environmental conditions at the time of use.
Power requirements	Parent unit: 3.7V 2600mAh Li-ion battery / Baby unit power adapter: Output: 5V DC @ 1A / Parent unit power adapter: Output: 5V DC @ 1A

IMPORTANT SAFETY INSTRUCTIONS

The applied nameplate is located at the bottom of the baby unit's base.

When using your equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:

1. Follow all warnings and instructions marked on the product.
2. Adult setup is required.
3. **CAUTION:** Do not install the baby unit at a height above 2 meters.
4. This product is not a substitute for adult supervision of the infant. Supervising the infant is the parent's or caregiver's responsibility. This product could cease operating, and therefore you should not assume it will continue working properly for any given period of time. Further, this is not a medical device and should not be used as such. This product is intended to assist you in supervising your baby.
5. Do not use this product near water. For example, do not use it next to a bath tub, wash bowl, kitchen sink, laundry tub or swimming pool, or in a wet basement or shower.
6. **CAUTION:** Use only the battery provided. There may be a risk of explosion if a wrong type of battery is used for the parent unit. The battery cannot be subjected to high or low extreme temperature and low air pressure at high altitude during use, storage or transportation. Disposal of battery into fire or a hot oven, or mechanically crushing or cutting or the battery can result in an explosion. Leaving the battery in an extremely high temperature surrounding environment can result in an explosion or the leakage of flammable liquid of gas. Battery subjected to extremely low air pressure may result in an explosion or the leakage of flammable liquid or gas. Dispose of used battery according to the information in **The RBRC seal.**
7. Use only the adapters included with this product. Incorrect adapter polarity or voltage can seriously damage the product.

   ⚠️ Power adapter information:
   Parent unit output: 5V DC 1A
   Model: VT05EUS05100
   VTech Telecommunications Ltd.
   Baby unit output: 5V DC 1A
   Model: VT05EUS05100
   VTech Telecommunications Ltd.

   ♻ Rechargeable battery information:
   Zhu Hai Great Power Energy Ltd.
   Li-ion battery, 3.7V 2600mAh
   Model: ICR18650-2600mAh-3.7V-1S1P

8. The power adapters are intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet.
9. For pluggable equipment, the socket-outlet shall be installed near the equipment and shall be easily accessible.
10. Unplug this product from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.
11. Do not cut off the power adapters to replace them with other plugs, as this causes a hazardous situation.
12. Do not allow anything to rest on the power cords. Do not install this product where the cords may be walked on or crimped.
13. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply in your home, consult your dealer or local power company.
14. Do not overload wall outlets or use an extension cord.
15. Do not place this product on an unstable table, shelf, stand or other unstable surfaces.
16. This product should not be placed in any area where proper ventilation is not provided. Slots and openings in the back or bottom of this product are provided for ventilation. To protect them from overheating, these openings must not be blocked by placing the product on a soft surface such as a bed, sofa or rug. This product should never be placed near or over a radiator or heat register.

17. Never push objects of any kind into this product through the slots because they may touch dangerous voltage points or create a short circuit. Never spill liquid of any kind on the product.
18. To reduce the risk of electric shock, do not disassemble this product, but take it to an authorized service facility. Opening or removing parts of the product other than specified access doors may expose you to dangerous voltages or other risks. Incorrect reassembling can cause electric shock when the product is subsequently used.
19. You should test the sound reception every time you turn on the units or move one of the components.
20. Periodically examine all components for damage.
21. There is a very low risk of privacy loss when using certain electronic devices, such as baby monitors, cordless telephones, etc. To protect your privacy, make sure the product has never been used before purchase, reset the baby monitor periodically by powering off and then powering on the units, and power off the baby monitor if you will not use it for some time.
22. Children should be supervised to ensure that they do not play with the product.
23. The product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

SAVE THESE INSTRUCTIONS

Cautions
1. Use and store the product at a temperature between 32°F and 104°F.
2. Do not expose the product to extreme cold, heat or direct sunlight. Do not put the product close to a heating source.
3. Batteries should not be exposed to excessive heat such as bright sunshine or fire.
4. ⚠️ Warning—Strangulation Hazard— Children have STRANGLED in cords. Keep this cord out of the reach of children (more than 3 ft (0.9m) away). Do not remove this tag.
5. Never place the baby unit(s) inside the baby's crib or playpen. Never cover the baby unit(s) or parent unit with anything such as a towel or a blanket.
6. Other electronic products may cause interference with your baby monitor. Try installing your baby monitor as far away from these electronic devices as possible: wireless routers, radios, cellular telephones, intercoms, room monitors, televisions, personal computers, kitchen appliances and cordless telephones.

Precautions for users of implanted cardiac pacemakers
Cardiac pacemakers (applies only to digital cordless devices):
Wireless Technology Research, LLC (WTR), an independent research entity, led a multidisciplinary evaluation of the interference between portable wireless devices and implanted cardiac pacemakers. Supported by the U.S. Food and Drug Administration, WTR recommends to physicians that:

Pacemaker patients
• Should keep wireless devices at least six inches from the pacemaker.
• Should NOT place wireless devices directly over the pacemaker, such as in a breast pocket, when it is turned ON.

WTR's evaluation did not identify any risk to bystanders with pacemakers from other persons using wireless devices.

Electromagnetic fields (EMF)
This VTech product complies with all standards regarding electromagnetic fields (EMF). If handled properly and according to the instructions in this user's manual, the product is safe to be used based on scientific evidence available today.

📦 WHAT'S IN THE BOX

Quick start guide

x 2   x 2

1 set for VM3262
2 sets for VM3262-2

---

1 CONNECT THE BABY MONITOR

📝 NOTES
• The rechargeable battery in the parent unit is built-in.
• Use only the power adapters supplied with this product.
• Make sure the baby monitor is not connected to a switch-controlled electric outlet.
• Connect the power adapters in a vertical or floor mount position only. The adapters' prongs are not designed to hold the weight of baby monitor, so do not connect them to any ceiling, under-the-table, or cabinet outlets. Otherwise, the adapters may not properly connect to the outlets.
• Make sure the parent unit, the baby units and the power adapter cords are out of reach of children.

---

1 CONNECT THE BABY MONITOR (CONT'D)

Charge the parent unit battery
When you have connected and turned on the parent unit, the battery will be charged automatically.

📝 NOTES
• Before using the baby monitor for the first time, charge the parent unit battery for 12 hours. When the parent unit battery is fully charged, the battery icon becomes solid 📶.
• It takes longer to charge the battery when the parent unit is turned on. To shorten the charging time, turn the parent unit off while charging.
• The standby time varies depending on the sensitivity level you set, your actual use and the age of the battery.

The battery icon indicates the battery status (see the following table).

BATTERY INDICATORS	BATTERY STATUS	ACTION
The screen displays 🔲. The 🔲 light flashes.	The battery has very little charge and may be used for only a short time.	Charge without interruption (about 30 minutes).
The battery icon becomes solid 📶.	The battery is fully charged.	To keep the battery charged, connect it to AC power when not in use.

---

2 POWER ON OR OFF THE BABY MONITOR

1. Slide the **ON/OFF** switch to power on or off your baby unit.
2. Press and hold **POWER** to power on or off your parent unit.

Press and hold

---

3 POSITIONING THE BABY MONITOR

⚠ CAUTION
• Keep the baby unit out of the reach of your baby. Never place or mount the baby unit inside the baby's crib or playpen.

⚠ CAUTION
• The default volume of your parent unit is level 3, and the maximum volume is level 5. If you experience high-pitched screeching noise from your baby monitor while positioning:
  - Make sure your baby unit and parent unit are more than 3 feet (1 meter) apart, OR
  - Turn down the volume of your parent unit.

📝 NOTE
• To avoid interference from other electronic devices, place your baby monitor at least 3 feet (1 meter) away from devices such as wireless routers, microwaves, cell phones and computers.

---

4 STATUS CHECK

Once you power on both your baby unit and parent unit, your parent unit displays image from the baby unit, and the **LINK** LED light turns on.

The baby unit's **POWER** LED light turns on.

👆 BASIC OPERATION - PARENT UNIT

Use the menu
Press **MENU** to enter the menu, or save a setting. You can use the parent unit for advanced settings or operations, such as to play or stop the baby unit's lullaby, or to adjust the baby unit's sound sensitivity.

While in the menu:
• Press ◀ or ▶ to scroll among the menu options.
• Press ▲ or ▼ to select an item.
• Press **SELECT** to confirm your selection.
• Press **TALK/EXIT** to exit the menu and return to live view.

Submenu
Main menu

Adjust parent unit speaker volume
1. Press **MENU** when in idle mode.
2. Press ◀ or ▶ to choose 🔊.
3. Press ▲ or ▼ to select desired volume level, then press **SELECT** to confirm your selection.

Zoom
1. Press **MENU** when in idle mode.
2. Press ◀ or ▶ to choose ⚙.
3. Press ▲ or ▼ to choose 🔍, press **SELECT**.
4. Press ▲ or ▼ to choose 2X (Zoom in) or 1X (Zoom out), then press **SELECT** to confirm your selection.

Talk to your baby unit
Press and hold **TALK** and speak to your parent unit. Your voice is transmitted to the baby unit. Release **TALK** when done talking and hear your baby again.

Turn off the screen
Press **POWER/LCD OFF** to switch off the screen. You can still hear sound from the selected baby unit.

⚡ TIP
• Press any keys on the parent unit to turn on the screen again.

📷 OVERVIEW - BABY UNIT

1	Light sensor	7	Speaker
2	Camera	8	Antenna
3	Infrared LEDs	9	Power jack
4	Microphone	10	Slots for wall mounting
5	POWER LED light	11	PAIR/RESET key
6	⏻ ON/OFF switch		• The parent unit and baby unit(s) provided are already paired.

📟 OVERVIEW - PARENT UNIT

1	Battery LED light	6	TALK/EXIT
2	3-level sound indicator light		• Press and hold to talk to the baby unit.
3	Arrow keys		• While in a submenu, press to exit.
4	MENU/SELECT	7	POWER/LCD OFF
5	LINK LED light	8	Microphone
	• On when the parent unit is linked to the baby unit.	9	Power jack
	• Flashes when the link to the baby unit is lost.	10	Antenna
		11	RESET
			• Force reboot the parent unit.
		12	Speaker

NEED HELP?

For operations and guides to help you use your video monitor, and for the latest information and support, check out our online help topics and online FAQs.

Use your smartphone or mobile device to access our online help.
• Go to **https://phones.vtechcanada.com/manuals**; OR
• Scan the QR code on the right. Launch the camera app or QR code scanner app on your smartphone or tablet. Hold the device's camera up to the QR code and frame it. Tap the notification to be redirected to the online help page.
  - If the QR code is not clearly displayed, adjust your camera's focus by moving your device closer or further away until it is clear.
You can also call our Customer Support at 1 (800) 267-7377 for help.

📟 PARENT UNIT ICONS

Status icons

📶 Connection status
• 📶 or 📶 displays when strong signal strength is detected between the baby unit and the parent unit.
• 📶 or 📶 displays when moderate or low signal strength is detected between the baby unit and the parent unit.

📱 Patrol mode
• Displays when the parent unit is in **PATROL** mode (For VM3262-2 only).

☐1 or ☐2 Current view status
• Displays the baby unit number of the baby unit that is being viewed.

🔍 Zoom
• Displays when the current image on the parent unit has zoomed in.

🌙 Night vision
• Displays when the baby unit being viewed has activated the night vision feature.

🎤 Talkback
• Displays when talking back to the baby units from parent unit.

🎵 Lullaby
• Displays when a lullaby is playing.

🔇 Mute alert
• Displays when the parent unit speaker volume is set to zero.
• Displays when the parent unit is talking to the baby unit.

°F or °C Real-time temperature
• Displays the real-time temperature detected by the baby unit in Fahrenheit (°F) or Celsius (°C) (e.g. **57°F** or **14°C**).

📶 Battery status
• 🔋➝🔋➝🔋➝🔋 animates when the battery is charging.
• 🔋➝🔋➝🔋➝🔋 animates when the battery is charging after it went empty.
• 🔋 displays solid when the battery is fully charged.
• 🔋 displays when the battery is low and needs charging.

Main menu icons

Main menu	Sub-menu	Main menu	Sub-menu
Volume 🔊	**Parent unit speaker volume** • Adjust the parent unit's speaker volume.	**Sound Detection** 🔔 VOX	**VOX (Voice Activated Alert) Sensitivity** • You can choose to hear sounds from the baby unit all the time, or to only hear sounds that exceed a certain level. Adjust the microphone sensitivity of your baby unit, the higher the sensitivity level, the more sensitive the baby unit is in detecting sounds for transmitting to the parent unit. See **Sound sensitivity and sound activation** section.
Settings ⚙ 🔍	**Zoom** 1X 2X • Zoom in and out of the video displayed from the baby unit.		
	Screen off timer OFF 5 30 60 • The parent unit display will dim to conserve energy after your chosen amount of time of inactivity.		**Sound-activated screen** OFF ON • When it is on, and the baby unit detects no sound, the parent unit screen stays off to save power. Once a sound is detected, the parent unit screen and speaker turns on automatically, and you can see and hear your baby. The parent unit will then turn off again after 50 seconds of no sound detection.
	Brightness ☀ • Adjust the parent unit's LCD screen brightness level.		
Temperature 🌡	**Temperature alert** OFF ON • Turn on/off temperature alert tone. • Set the parent unit to beep whenever the room temperature detected by the baby unit falls outside of the set temperature range.		**NOTE** • When the parent unit screen is off and it receives alerts, for example, link lost between parent unit and baby unit, or battery is low, the parent unit screen and speaker will turn on.
	MIN MAX • Set the minimum/maximum temperature.		
	°F °C • Set temperature display in Fahrenheit (°F) or Celsius (°C).		

Parent unit icons (cont'd)

Main menu icons

Main menu	Sub-menu	

Lullaby

Lullaby volume
- Adjust the baby unit's speaker volume when playing the lullaby.

stop 1 2 3 4
- Select one of the four melodies to play, or stop a lullaby.

Monitoring Mode (For VM3262-2 only)

Patrol mode
- Monitor your baby in PATROL mode, where the screen will cycle through display videos streamed from all the linked baby unit cameras (For VM3262-2 only).

cam 1 / cam 2
- View the video from your selected paired baby unit's camera.

Warning icons and messages

Battery low at Parent Unit	The battery is empty and needs to be recharged.
	Operation is in progress.
Temperature too high	The temperature detected by the baby unit is higher than the desired temperature alert range.
Temperature too low	The temperature detected by the baby unit is lower than the desired temperature alert range.
No Link to Camera	The parent unit is searching for baby units or the link between the baby unit and the parent unit is lost.
	The parent unit is connected to AC power.

Parent Unit Indication Lights

LINK
- On when the parent unit is linked to the baby unit.
- Flashes when the link to the baby unit being viewed is lost.

- On when the parent unit is connected to AC power, or the battery is charging.
- Flashes when the parent unit battery is low and needs charging.
- Off when the parent unit is disconnected from AC power.

Sound sensitivity and sound activation

Adjust the sound sensitivity of the baby unit

You can choose to hear sounds from the baby unit all the time, or to hear sounds that exceed a certain level. You can use the parent unit to adjust the microphone sensitivity of your baby unit. The higher the sensitivity level, the more sensitive the baby unit is in detecting sounds that transmit to the parent unit. The VOX sensitivity level is preset to the highest level.

VOX SENSITIVITY LEVEL	Highest	High	Medium	Low	Lowest
Description	The parent unit speaker is constantly on, and you will hear all sounds (including background noises) from your baby's room.	The parent unit speaker turns on for soft babbling and louder sounds from your baby. It remains quiet when your baby sleeps soundly.	The parent unit speaker turns on for loud babbling and louder sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for crying and louder sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for loud crying or screeching sounds from your baby. It remains quiet when your baby makes soft sounds.

Sound activated screen

When sound activation is on, the parent unit screen stays off to save power when the baby unit detects no sound. Once the baby unit detects sounds that are louder than the chosen sound sensitivity level, the parent unit screen turns on automatically. It will then turn off again after 50 seconds of no sound detection.

Dim mode

The dim mode is to help you save the parent unit power. Your parent unit display will dim automatically after 10 minutes of inactivity, in which there is neither key pressed nor alert received from the baby unit.

10 min inactive

Press any button

📝 **NOTE**
- While the screen is dimmed, any keypress or alert message will trigger the screen to return to the preset brightness level. After 10 minutes of inactivity, it will resume to dim mode.

Night vision

The baby unit has infrared LEDs that allow you to see your baby clearly at night or in a dark room. When the baby unit being viewed detects low light levels, the infrared LEDs are switched on automatically. The images from the baby unit are in black and white, and appears on the screen.

📝 **NOTES**
- It is normal to see a short white glare on your parent unit screen as the baby unit is adapting to the dark environment.
- When the infrared LEDs are on, the images are in black and white. This is normal.

☼ **TIP**
- Depending on the surroundings and other interfering factors, like lighting, objects, colors and backgrounds, the display resolution may vary. Adjust the baby unit's angle or place the baby unit at a higher level to prevent glare and a blurry display.

For VM3262-2 only

Status check - Two baby units

If you are viewing baby unit 🔳 1, the **POWER** LED light of baby unit 🔳 1 turns on. As baby unit 🔳 2 is not being viewed, its **POWER** LED light flashes.

🔳 1   🔳 2
ON   ON

📝 **NOTE**
- If you power on only one baby unit, your parent unit may display and the LINK LED light will flash.

Change different views - Patrol
1. Press **MENU** when the parent unit is idle.
2. Press ◄ or ► to choose.
3. Press ▼ or ▲ to choose, then press **SELECT** to confirm your selection.

10s

Change different views - Single-cam
1. Press **MENU** when the parent unit is idle.
2. Press ◄ or ► to choose.
3. Press ▼ or ▲ to choose between cam and cam, then press **SELECT** to confirm the camera unit you would like to view.

Mount the baby unit on dry wall (optional)

📝 **NOTES**
- Check for reception strength and camera angle before drilling the holes.
- The types of screws and anchors you need depend on the composition of the wall. You may need to purchase the screws and anchors separately to mount your camera units.

① Align the wall mount bracket and screws with the holes in the wall as shown. Tighten the screw in the middle hole first, so that the wall mount bracket position is fixed. You can tighten the other screw in the top hole.

📝 **NOTE**
- Check for reception strength and camera angle before drilling the holes.

② Place the wall mount bracket on a wall and then use a pencil to mark two holes in parallel.

Drill two holes in the wall (7/23 inch drill bit). If you drill the holes into a stud, go to step 3.

-OR-

If you drill the holes into an object other than a stud, insert the wall anchors into the holes. Tap gently on the ends with a hammer until the wall anchors are flush with the wall.

③

④

⑤ Place the camera unit on the wall mount bracket, and then slide it forward until it locks into place. Connect the power adapter to the camera unit and a power supply not controlled by a wall switch.

ᗏᴀ Frequently asked questions

Below are the questions most frequently asked about the baby monitor.

Why does the baby monitor not respond normally?	Try the following (in the order listed) for common cure: 1. Disconnect the power to the baby units and the parent unit. 2. Wait a few seconds before connecting power back to the baby units and the parent unit. 3. Turn on the baby units and the parent unit. 4. Wait for the parent unit to synchronize with the baby units. Allow up to one minute for this to take place.
Why don't the power-on light of the baby unit and parent unit go on when I switch on the units?	Perhaps the parent unit is not connected to the power. Insert the appliance plug into the parent unit and put the adapter in a wall socket. Then, press and hold **POWER** to switch on the parent unit and to establish connection with the baby unit. Perhaps the baby unit is not connected to the power. Insert the appliance plug into the baby unit and put the adapter in a wall socket. Then, slide the **⏻ON/OFF** switch to **ON** to switch on the baby unit and to establish connection with the parent unit.
Why doesn't my parent unit charge while connected to AC power?	Make sure the power is not controlled by a wall socket. You may have used the battery for a long time. See **Warranty** for repair/replacement.
Why is my screen in black and white?	The screen is in black and white during night-time or in a dark room when the night vision feature is activated. This is normal.
Why do I get glare or blurry display on my screen when viewing my baby at night?	During night-time or in a dark room, the surroundings and other interfering factors, like lightings, objects, colors and backgrounds may affect the image quality on your parent unit screen. Adjust the baby unit's angle or place the baby unit at a higher level to prevent glare and blurry display.
Why does the baby monitor produce a high-pitched noise?	The parent unit and baby units may be too close to each other. • Move the parent unit away from the baby units until the noise stops; OR • Turn down the volume of your parent unit.
Why does the parent unit beep?	The baby units may be out of range. Move the parent unit closer to the baby units (but not less than 3 feet). The parent unit may not have enough charge for the parent unit to perform normally. Charge the battery in the parent unit until the battery icon becomes solid. The temperature of your baby's room may be too high or too low.
Why does the parent unit react too quickly to other sounds?	The baby unit also picks up other sounds than those of your baby. Adjust the VOX sensitivity level to a lower level or lower the parent unit speaker volume.
Why don't I hear a sound/Why can't I hear my baby cry?	The parent unit speaker volume may be too low. See **Adjust parent unit speaker volume** to increase the volume. You may have set a low VOX sensitivity level. See **Adjust the sound sensitivity of the baby unit** to set to a higher level.
Why can't I establish a connection? Why is the connection lost every now and then? Why are there sound interruptions?	The baby units may be out of range. Move the parent unit closer to the baby units (but not less than 3 feet). Other electronic products and wireless products may cause interference with your baby monitor. Try installing your baby monitor as far away from these devices as possible. If you power on only one baby unit, your parent unit may display, and the **LINK** LED light will flash.

FCC and IC regulations

FCC Part 15

This equipment has been tested and found to comply with the requirements for a Class B digital device under Part 15 of the Federal Communications Commission (FCC) rules. These requirements are intended to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING: Changes or modifications to this equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

To ensure safety of users, the FCC has established criteria for the amount of radio frequency energy that can be safely absorbed by a user or bystander according to the intended usage of the product. This product has been tested and found to comply with the FCC criteria. The baby unit shall be installed and used such that parts of all persons' body are maintained at a distance of approximately 8 in (20 cm) or more. The transmitter and antenna of the parent unit shall be held at least 1 in (2.5 cm) from your face.

This Class B digital apparatus complies with Canadian requirement: CAN ICES-3 (B)/NMB-3(B)

Industry Canada

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions: (1) This device may not cause interference. (2) This device must accept any interference, including interference that may cause undesired operation of the device.

The term "IC:" before the certification/registration number only signifies that the Industry Canada technical specifications were met.

This product meets the applicable Innovation, Science and Economic Development Canada technical specifications.

RF radiation exposure statement

The baby unit complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. The baby unit should be installed and operated with a minimum distance of 8 in (20 cm) between the baby unit and all persons' body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment complies also with Industry Canada RSS-102 with respect to Canada's Health Code 6 for Exposure of Humans to RF Fields.

Cable management
